

# Project Profile

Foxwood Center Business Park  
Orange Park, FL Built 1987

## *Scope of Work:*

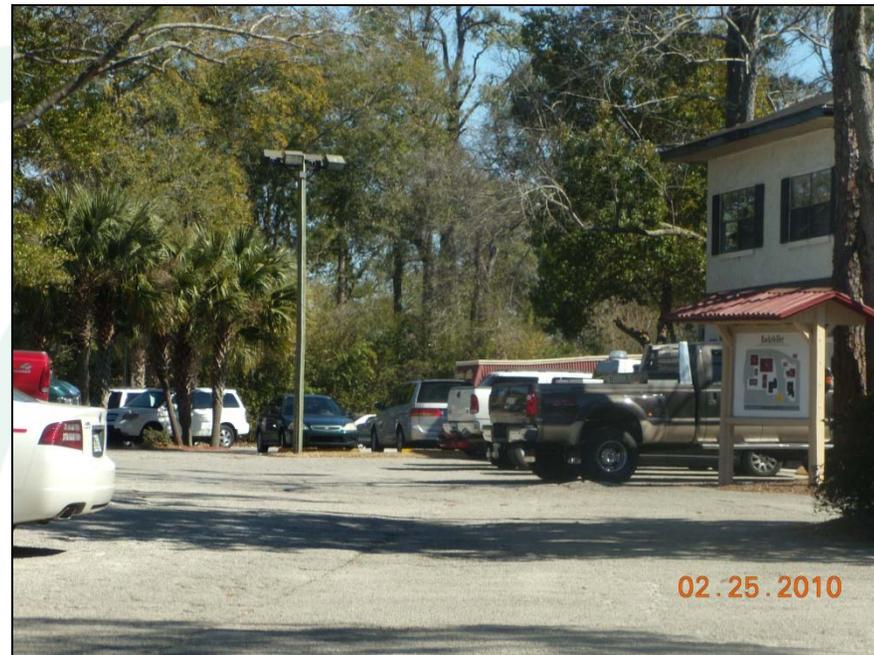

An office park with pervious pavement.  
No storm water ponds on-site.

## *Concrete:*

Approximately 5" based on native  
material.

## *Update: February, 2010*

Original owner is 100% satisfied with project. Claims no maintenance has been done. Notice the enormous oak trees in this parking lot. There are no root upheavals as the pervious allows for air and water to reach the root system. Original owner also claims no water retained during storm events.
